To whom it may concern;

GreatWest Kenworth Ltd operates with locations in Clairmont, Lethbridge, Medicine Hat and Red Deer; as well as our original store at 58th and Blackfoot Trail SE in Calgary. Each branch offers parts, service and truck sales departments to help benefit customers across the entire province and each relies on the foundation of the GreatWest Kenworth Ltd business philosophy to be able to utilize the resources we have to make the best decisions possible to benefit our customers.

With the widespread coverage of the province, GreatWest Kenworth Ltd can hang its hat on being the number one supplier to the oil fields' trucking needs in Alberta; as well as being able to utilize this experience locally to assist the international oil market. Along with this market, there is also a strong focus on both the transportation and agriculture sectors that are looking for a truck that will withstand the most extreme Alberta conditions. It is with this experience and knowledge that GreatWest Kenworth Ltd owners aim to be the only choice in the heavy duty truck industry for anyone in Alberta.

Over the years GreatWest Kenworth Ltd has always looked for opportunities for growth an expansion of the products and services that we can provide to our customers. Progressive thinking and attitudes have helped to propel the dealerships to be on the cutting edge of trends in the industry, as well as offering a wide variety of products and services under one roof.

One such product, The Guardian Safety System with *Intel-a-Valve Technology*TM, patented by Diesel Tech Industries, represents exactly what we at GreatWest Kenworth Ltd are excited about. As the first official dealership, GreatWest Kenworth Ltd can present to our customers a 21st century innovation in the positive air-flow shutdown area. The Guardian Safety System is the only *true remote* activated shut down valve that, in our opinion, transcends the market to provide complete safety and security for our customers and their families. We have presented this innovative product to our major oil and gas customers and the results have been excellent.

As the president of GreatWest Kenworth Ltd, I heartily support all innovative technology and when a product of this caliber comes to the market, we have to be the first in line for safety and the Guardian Safety System certainly fits the bill. I will continue to support the Guardian Safety System and encourage all diesel engine operators in need of a shutdown system to explore the advantages of this product. I am certain that they will come to the same conclusion that our company has.

Yours truly,

Paul Storwick
President

GreatWest Kenworth Ltd
